Underwriting process for credit insurance

**How does
it work?**

1

The French company and the buyer plan to sign / have signed a commercial contract

2

We receive an application for cover from the French exporter or the bank

3

We perform KYC checks

4

If those preliminary checks are satisfactory, we conduct a risk analysis as well as a buyer financial analysis and an E&S analysis (when applicable*)

5

We also seek advice from local French authorities on issues ranging from environment, macroeconomic context, to security before the decision making **

6

If the project meets our requirements, we issue a promise / offer of cover to the French exporter / bank

7

The insurance policy is issued as soon as the covered contract come into effect

8

A minimum premium is paid at the time the policy is issued. The rest of the payment is due depending on the type of insurance/guarantee

* Depending on the amount of the contract (> €10M) and/or location of the operation in a sensitive area.

** Decision making process: Decisions to grant cover are made by an interministerial Committee or by Bpifrance Assurance Export, acting under delegated powers granted by its governing authorities.

Focus on Buyer Credit Insurance

The buyer credit insurance gives the foreign buyer the opportunity to benefit from a loan provided by a French or a foreign bank. This financing solution allows the buyer to benefit from a longer credit period at an attractive rate, when buying products from French suppliers.
